Heading

Heading - Inspire Personal and Impactful Caregiver Relationships
Subheading - All the tools you need to create and manage your own team of care.
Call To Action - "Download in the App Store" and "Get it in Google Play" and create an account to get started today.

Team of Care Section

This section should take the form of an interactive team circle layout. On a large screen this would look like a participant account element at the center with different team member type elements encircled around the participant element. Each element displays more detailed information about the role when hovered over and selected. On a mobile device, this display turns into an accordion design to conserve space.

1. Case Manager
    - Although Case Managers are not part of Simpl Care's internal operations, they play a vital role in the participant's team of care. They create the Plan of Care and manage the participant's Medicaid budget at the state level. At Simpl Care, we build tools to help Case Managers better serve their participants and engage more actively in the care team. Learn more about our solutions for Case Managers.
2. Participant Success Representative
    - Every participant and their team of care are assigned a full-time Simpl Care Participant Success Representative. Acting as the team's guide to success, they provide technical support, connect teams to specialized resources, and offer a listening ear. They are fully dedicated to the participant's success.

3. Guardian
    - A guardian, often a legally authorized representative or responsible adult, plays a central role in the participant's care. In some cases, the participant may act as their own guardian. At Simpl Care, we believe guardians should have full control over their loved one's care—deciding who provides care, when it's delivered, and the activities involved. Our mobile technology empowers guardians to make these decisions with ease and confidence. Learn more about our solutions for Guardians.
4. Caregivers
    - Caregivers are the backbone of a team of care. They provide the hands-on, face-to-face care for participants. At Simpl Care, we recommend having 3-5 caregivers on a team to ensure consistent and reliable support. Participants can either choose trusted family or friends as caregivers or select from our trained pool of Simpl Care employees. Learn more about our solutions for Caregivers.

How It Works

This section should take the form of a step by step progressive list. No preference on shape or form.

1. A Guardian creates an account
2. The Guardian creates a Participant
3. A Participant Success Rep is assigned
4. The Case Manager adds Simpl Care as an authorized provider
5. The Guardian invites caregivers to join the team of care
6. The Participant Success Rep qualifies the Caregivers
7. The Participant Success Rep activates the Participant account
8. The Guardian creates and assigns shifts
9. Sit back and relax because Simpl's admin team has the rest. Billing, payroll, Medicaid reporting, we got it.

Is Simpl Right For You?

This section should be reactive with the ability for website users to click a checkbox for each of the following questions. If they check each box, the response box should change based on the users responses.

1. Are you or a loved one approved on a medicaid waiver?
2. Are you looking for a provider that supports 1 on 1 non medical services of any kind? (For example; Supported Living, Community Living, Personal Care, Companion Services, Supported Employment)
3. Do you want to full control of your loved-one's care without all the administrative work that comes along with it?
4. Are you comfortable using mobile apps?

Response negative : We recognize that every Participant is unique and has different needs and circumstances. Additionally, we understand that we aren't equipped to support every participant in their unique needs and circumstances. Based on your responses to the questions above, we are not a great fit. We wish you the best of luck in finding a Provider that can meet your needs!

Response positive : Woohoo 🙌 You may be a great fit for Simpl Care services. Download the app and set up an account to get started today.
